## Profile Summary

Experienced QA Engineer with over 9 years of expertise in software quality assurance, release engineering, and end-to-end testing. Proven ability to lead teams through the release process in both pre-production and production environments, ensuring smooth and secure deployments. Strong background in managing cross-functional teams, driving high-quality releases, and improving testing processes. Demonstrated success in delivering projects across multiple platforms while focusing on continuous improvement and maintaining high-quality standards. Leverages Python and Pytest to automate testing processes, enhance test coverage, and accelerate release cycles.

## Competencies

- QA Engineering & Testing
- Security Testing
- Automation & Scripting
- Release Engineering & Configuration Manager
- Cross Platform Testing
- Test Management & Bug Tracking
- Scrum & Agile Methodologies
- Process Improvement

## Technical Skills

- **Coding expertise:** Python, Selenium, Pytest Framework
- **Domain Expertise:** Security, Virtualization, Backup-Restore, L10N, I10N
- **Test Management Tools:** Testlink, Testrail, Zephyr, X-ray
- **Bug Reporting Tool:** Bugzilla, Redmine, Jira
- **Cloud | Data Center:** AWS, Azure, GCP, VM Ware, Hyper-V, Go4lab, VirtualBox

## Professional Experience

### Forcepoint Pvt. Ltd. - Senior Quality Assurance Engineer

(Feb 2023-Jan 2025)

- Spearheaded testing efforts for Forcepoint-One SWG and Forcepoint-One ZTNA, focusing on web access security, malware prevention, and remote access solutions, ensuring a seamless and secure user experience.
- Successfully managed release processes for production and on-premises deployments, ensuring timely and efficient delivery of software updates.
- Developed and executed test plans for **web access security, malware prevention, and remote access solutions**.
- Managed **15+ test suites** and achieved **95% test coverage** across Windows, macOS, Chrome, Firefox, and Safari.
- Performed extensive functionality, UI, and regression testing on Windows and Linux clients, guaranteeing a consistent and user-friendly experience across platforms.
- Hands on experience on **Python and Pytest framework** for structured test development, execution, and reporting, leading to improved test organization and faster feedback cycles for regression Testing

## **Msys Technologies - Senior Quality Assurance Engineer**

**(Jan 2022-Jan 2023)**

- Played a key role in the quality assurance of the Rubrik Polaris SaaS platform, a unified data management solution for on-premises and cloud environments, ensuring data integrity and security.
- Conducted rigorous UI validation, functionality testing, and regression testing for weekly releases, ensuring the platform's stability and reliability.
- Actively participated in agile methodologies and mentored junior team members, fostering a collaborative and efficient working environment.

## **ACCOPS PVT. LTD. - Quality Assurance Engineer**

**(Dec 2019-Jan 2022)**

- Tested Accops HyWorks, a desktop and application virtualization solution, ensuring seamless delivery of virtualized environments to end-users, enhancing productivity and accessibility.
- Conducted functionality, UI, and regression testing on **Windows 10, Windows 11, Ubuntu 20.04, and CentOS 7 clients**, ensuring consistent performance and usability.
- Verified client-server communication by **analyzing network traffic**. Examined **system logs and generated reports** to identify and resolve performance bottlenecks.
- Utilized Python-Pytest framework for test automation to streamline regression testing processes.

## **Quick Heal Technology LTD - Associate Localization Test Engineer**

**(Feb 2017-Dec 2019)**

- Conducted comprehensive localization testing for **Quick Heal Antivirus** and **Seqrite Endpoint Security** for various languages, including Japanese, Korean, and Arabic, ensuring product accessibility for a global audience.
- Conducted functionality, regression, and sanity testing on **Windows, Mac OS, and Android platforms** for **Quick Heal Antivirus** and **Seqrite Endpoint Security**, ensuring stability and reliability across all supported languages.
- Developed and implemented **Python-based automated test scripts** for localization testing, reducing manual testing effort by **30%**.

## **Varian Software Technology - Jr. Automation Test Engineer**

**(Aug 2015-Feb 2017)**

### **Project 1: www.swagista.com** (Jun 2016 - Aug 2016)

Conducted testing for a pre-launch e-commerce website as an Automation Test Engineer. Responsibilities included writing test cases based on client requirements, performing load testing using JMeter, and conducting ad-hoc testing to identify critical bugs. Created defect test cases to verify and track issues effectively.

### **Project 2: C-Automation** (Feb 2016 - May 2016)

In this project, Utilized Jenkins to automate testing processes for a cloud-based system. The automation process involved running tests on slave machines by fetching job files from a directory. Configured Jenkins and ensured smooth job execution across the system.

## **Educational Qualification & Certifications**

- **MBA (Operations)** Rajaram Shinde College of MBA, Mumbai University. (Pursuing 2023-25)
- **B.E. (IT)** RMD Sinhgad College of Engineering, Pune / University of Pune. (2011-15)
- **H.S.C** Saraswati Mandir Jr. College, Pune / Maharashtra State Board. (2010 -11)
- **S.S.C )** Bhave High School, Pune / Maharashtra State Board (2008-09)

Certified in RPA (UI Path), Advanced Excel, and VBA.
